

Join the ImPACT Coalition: Just Institutions and the International Court of Justice

Kick-off Session:
May 10, 2024, 12:30-2PM
Room: **CR-8**

(More opportunities to engage to come!)

The expectation of accountability and a rules-based legal order was a central ambition of the international governance system. With conflicts raging in nearly every region and atrocities compounding, more must be done to ensure the promise of justice is not illusory. Civil society has a vital role to play in this regard, working with States and other stakeholders to advance key judicial reform initiatives leading up to and beyond the Summit of the Future.

The ImPACT session will explore tangible ways to bolster the international judicial ecosystem to uphold the rule of law by increasing participation of States in international courts and improving linkages between domestic, regional, and international institutions. The interactive session will also explore such cross-cutting themes as access to justice, cooperation, and complementarity.

This coalition supports the universality and effectiveness of global judicial architecture, including the International Court of Justice, the primary means for the pacific resolution of disputes among States; the International Criminal Court, “the hope of humanity” to end impunity; the International Tribunal on the Law of the Sea; and newly contemplated institutions that effectively work with regional and domestic systems.

We hope you can join us for this session to help co-create the coalition. For those unable to attend, you can still contribute to the coalition! We will convene online for ImPACT Coalition discussion(s) post-Nairobi (first late May-June TBC) and will have many future opportunities in which partners can take part and/or lead for diverse and inclusive discussion and action from the Civil Society Conference to the Summit of the Future and beyond.

Kindly indicate your interest in joining the coalition through the registration link:
